10 REASONS TO CHOOSE

Rabat

Tutoring Academy

At Rabat Academy, we offer a flexible, personalized learning experience designed for middle and high school students. With online courses, one-on-one tutoring, hands-on projects, life-skills workshops, and extracurriculars, students grow into independent learners while exploring their passions. It's a smart choice for parents who want their child to thrive—academically and personally.

1

PERSONALIZED TEACHING

At Rabat Academy, we understand that middle and high school students don't all learn the same way. That's why we personalize the learning experience to fit each student's pace, style, and goals. Research shows that personalized education helps students build confidence, catch up on tough topics, and even move ahead up to three times faster than their classmates. Our smart, AI-powered platform figures out exactly where a student needs help and delivers lessons to fill in those gaps. Then, our expert tutors step in for one-on-one sessions to make sure everything clicks. It's learning that's focused, efficient, and built to help students succeed—whether they're aiming to boost their grades, prep for exams, or get ahead.

2

A WORLD CLASS EDUCATION

Our students benefit from top-notch online courses and expert one-on-one tutoring, project based education, lifeskills workshops and extracurricular activities. Our Cognia accredited courses foster critical thinking, research skills, and global awareness. Upon completing graduation requirements, our students receive a fully accredited A Levels Certificate providing them with a pathway to top universities, ensuring strong academic and professional opportunities.

3

FITS YOUR LIFE

Rabat Academy's flexible hybrid model gives students the freedom to learn on their terms. With a mix of online classes, one-on-one tutoring, and no age restrictions, our program adapts to your child's lifestyle—not the other way around. Whether they're an athlete with a demanding training schedule, a performer, or a student who took time off due to illness or other life events, we make it possible to stay on track and thrive academically. At Rabat Academy, education fits real life.

4

CARING & SUPPORTIVE

Traditional school environments can sometimes do more harm than good—creating peer pressure, unhealthy competition, and anxiety. Many students face bullying or feel overwhelmed by unrealistic expectations. Others fall behind due to hospitalization or life events, only to find they're no longer eligible to return because of age restrictions. At Rabat Academy, we take a different approach. Our hybrid learning model removes these stressors and creates a safe, supportive space where students can focus on what really matters: learning, growing, and rebuilding confidence at their own pace. Here, every student is seen, supported, and given the chance to succeed—no matter their journey.

5

MORE TIME FOR EXPLORATION

Traditional schooling often limits students' ability to explore their interests. With hybrid learning, they have more time and energy to participate in sports, music, and creative pursuits. No matter your passion, Rabat Academy encourages a balanced lifestyle that nurtures both academics and personal growth.

7

STRONGER SOCIAL SKILLS

Rather than being confined to a classroom of same-age peers, hybrid learning fosters more diverse social interactions. Through project-based learning, extracurricular activities – including community service - and life-skills workshops, our students develop effective communication, teamwork, and leadership skills—essential for both academic and real-world success.

9

IMPROVED FOCUS & PERFORMANCE

Large class sizes and distractions often slow down learning. With online lessons and one-on-one tutoring, students receive uninterrupted attention, ensuring they stay engaged, fully understand concepts, and perform better in exams and coursework.

6

MADE FOR SPECIAL NEEDS

For students with ADHD or dyslexia, traditional school can be overwhelming. It can be disheartening for gifted students, leading to disengagement. Our approach ensure all students are taught and receive guidance based on their individual needs, ensuring enthusiasm for learning and academic success.

8

UNIVERSITY AND CAREER READINESS

Hybrid learning develops essential skills like time management, self-discipline, and independent thinking—preparing students for university and beyond. By learning how to self-motivate and manage their studies effectively, they transition more smoothly into higher education and future careers.

10

IT'S HOMESCHOOLING MINUS THE STRESS

At Rabat Academy, students enjoy the freedom and flexibility of homeschooling with the added support of expert tutors and structured online lessons. Parents have control over their child's education—without the stress of having to manage it all themselves.

BENEFITS OF THE BRITISH CURRICULUM

- A highly regarded and accredited secondary school programme that allows seamless integration with national curricula worldwide.
- A globally-recognised leaving qualification, accepted for college/university admission in over 160 countries.
- Designed to encompass global concepts, being fully international and independent of traditional educational philosophy.
- Extensive **course catalog** with courses in all core subject areas as well as electives, and extra-curricular .
- An opportunity to personalise the individual's learning programme according to their strengths, interests, and cultural preferences.
- Unrivalled in its flexibility with respect to the timing of the end-of-programme assessments, with the individual student deciding when to sit final exams.
- A competency-based approach to education, without age restrictions

OUR PROGRAM ACCREDITATIONS

All our UK Curriculum courses are accredited by Cognia®, a non-profit, non-partisan organisation that conducts rigorous, external reviews of schools and school systems. Students graduating from Cognia accredited schools are recognised at the best schools and universities around the world. of educational institutions and systems to ensure that all learners realise their full potential.

Cognia® is the world's largest community of educational professionals in the world, serving more than 34 000 educational institutions. They conduct rigorous reviews of a variety of educational institutions and systems to ensure that all learners realise their full potential.

Globally Recognized Curricula

At the upper secondary level, we offer both Cambridge International and Pearson Edexcel courses via the CambriLearn Platform. Both are some of the most widely recognized programs, offering globally accredited qualifications that prepare students for higher education and career success. While both provide IGCSE and A-Level pathways, they differ in structure, assessment methods, and flexibility.

Cambridge International Curriculum

- Developed by Cambridge Assessment International Education (CAIE), part of the University of Cambridge.
- Offers a broad and balanced curriculum, encouraging critical thinking and independent research.
- Assessments focus on application-based learning, requiring students to demonstrate analytical and problem-solving skills.
- IGCSE and A-Level subjects are often structured with core and extended options, providing flexibility for different ability levels.
- Recognized by universities worldwide for its rigorous academic approach and emphasis on inquiry-based learning.

Pearson Edexcel Curriculum

- Developed by Pearson, the UK's largest awarding organization.
- Offers a more modular structure, allowing students to take exams in stages rather than at the end of a two-year period (as in Cambridge).
- Assessment is a mix of coursework and exams, with more emphasis on practical application and real-world problem-solving.
- IGCSE and A-Level subjects tend to have more straightforward exam formats, with a greater focus on structured responses and mark schemes.
- Recognized globally, with strong ties to UK universities and vocational pathways.

Which Curriculum is Best?

The choice between Cambridge International and Pearson Edexcel depends on a student's learning style and goals:

- Cambridge is ideal for students who enjoy independent research, in-depth subject exploration, and application-based assessments.
- Edexcel suits students who prefer a structured, modular approach with ongoing assessments and a clearer marking system.
- Both curricula are highly respected and open doors to top universities worldwide. The best choice depends on a student's academic strengths, preferred learning style, and long-term aspirations.

Lower Secondary Courses

Our lower secondary online courses include two levels: Foundation I and II. These courses are designed to prepare for the next phase of the student's education; International GCSE (or IGCSE). CambriLearn's courses offer the three core (required) subjects: English, Mathematics, and Science.

Electives: French, and Spanish to prepare students for second languages at higher levels. Students also have the option of an Economic and Management Science (EMS) course which introduces the International GCSE commerce subjects.

Select 5 subjects including Math, Science and English.

Foundation Phase I	Foundation Phase II
English	English
Maths	Maths
Science	Science
French	French
Spanish	Spanish
Business Studies	Business Studies
History	History
Robotics	Coding in Python
Social Emotional Learning	IGCSE Subject Choice Support

Upper Secondary Courses

Our International GCSE courses build on the foundation of the Lower Secondary levels and end with the IGCSE Examination. They are followed by the International British Curriculum's A Levels, a two-year course that ends with an internationally recognised examination. These two years are split between two levels: the first year is covered in the AS Level courses and the second year is covered in the A Level courses. This enables students to choose to write only the AS Level examinations or to proceed to the full A Level course over two years. All subjects listed below are offered as part of the Cambridge Curriculum. Subjects where we also offer a Pearson Edexcel course are followed with a (P)

IGCSE
